Art Unit: 1731

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunihisa et al. (5,445,713).

3. Applicant's arguments filed February 4, 2003 have been fully considered but they are not persuasive.

With respect to the rejection applicants argue:

The examiner indicates in the November 13, 2002 Interview Summary that “language indicating that two of the rolls are counter rotating ... could overcome the art of record if claimed with respect to specific loops.” The applicants amend claims 26 and 38 accordingly. This rejection should be withdrawn.

This argument is not persuasive. It is submitted that the claims as amended do not distinguish over the art of record. Claims 26 and 38 now recites “the first wire section and the second wire section are counter-rotating”. Kunihisa et al. discloses wire sections defined by endless loop 5 as shown in Fig 2 and the loop surrounding the letter “R” in the figure. These loops are counter rotating.
